

## README

c) Deliverables(PDFs, runfiles, Log files) are included in the deliver/projectx subdirectory. Where x represents the project#

---

How TO TEST:

### **COMMAND LINE:**

To clean, build and create JARs for all projects' code please type in the KeyVs folder:

```
"ant clean"
```

```
"ant jar"
```

Following which change directory to point to project you're testing, for example:

```
"cd deliver/project3"
```

After which,

```
"bash Pull_Based_Integration_Test.sh"
```

```
"bash Push_Based_Integration_Test.sh"
```

There is a flag in each of these files to set the TTR, Profile mode to display the average search results time taken due to there being several invalid cache entries and the ability to change the PUSH\_BASED\_APPROACH to true or false.

## OR ECLIPSE

Please install Eclipse for Java and then follow the screenshot!
